RE: Shell Chemical
Goal Venture Project

Dear Steve:

We wanted to write you and express our sincere appreciation for the extremely impressive effort put forth by your company on both the Goal Control Building and for the Woodstock Substation #1.

We had our backs against what appeared to be an insurmountable wall in the form of a very aggressive schedule. Normally we would have been faced with trying to coordinate several subcontractors and convincing them that it was in their best interest to work 7 days per week; but do to your company's versatility, we only had to convince you of our circumstance. Your direct involvement and concern for the schedule had a tremendous impact on your field personnel who responded to your leadership with an exceptional effort to help us meet the schedule.

Even more impressive, was the dedication of your team to help us achieve the concept of an incident and injury free work place. It was apparent that your employees were supporting our efforts to provide a safe environment.

We plan to work with your company again and look forward to many successful projects together.

Sincerely,

Sincerely,

Sincerely,

Michael L Barber
Vice President

Tommy Hutchinson
Project Manager

Tim Willis
General Superintendent
