Re: BRPP G-Line Project
Multi-Purpose Building

Dear Mr. Moore:

I am writing to you to express my appreciation for the impressive effort put forth by your company on the above referenced project.

I understand that the managing contractor for the project required that your original schedule be compressed from five months to three months. Faced with this difficult situation, Moore responded with execution of the work on an overtime basis and completed the work on-schedule as requested. This was very important to the overall G-Line Project as completion of Moore's work helped open work fronts to other contractors needing to get into the area to start their work. The quality of your work was outstanding, and most importantly, the work was completed without any safety incidents.

Obviously, Moore Construction was the right contractor to bring this project in on time with the desired quality and safety performance. Your company's professionalism and work ethic sets a good example for the construction industry.

Sincerely,

A handwritten signature in black ink, appearing to read "M. J. Kirsch".

M. J. Kirsch
BRPP G-Line Construction Manager
